

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

An INDEX to Volume X, being the Second Vol. of the Second  
Century of these Tracts, for the Year 1675.

The letter *n* signifies the Number; the letter *p* the Page.

A

**A** I R. Experiments made in the Air-pump at Paris, to shew, what liquors mingle or ferment in *vacuo*, with Marginal notes from the English on the same, n. 119. p. 443. More by the same Parisians, to try the passages of Air through Plants and Woods, n. 120. p. 477. Ten Experiments of Mr. Boyle about the weaken'd Spring, and other unobserved effects of the Air, and to discover, whether the Spring of the Air, as it may many waies be increased, so may not by other means than of *Cold* and *Dilatation* be weaken'd: And to shew the change of Colours producible by Air in some Solutions and Precipitations, n. 120. p. 467. Compare the Notes of an Anonymous herein, n. 122. p. 533. More Parisian Experiments, to try, whether the vacuum will be of use to the Preservation of Bodies, n. 121. p. 492: Compare this with Mr. Boyle, publisl't on the same, An. 1674.

**Agriculture and Gardening.** See a large account of best English Writers in the *Breviat* of Sr. Hugh Plats, n. 113. p. 302; and in the *Epitome* of J. B. Gentl. n. 114. p. 320; and in the *System, or the Mystery of Agriculture* discover'd by J. W. Gentl. n. 115. p. 352. *The Planter's Manual*, n. 116. p. 373. *Earths, Composts, by M. Evelyn*, n. 119 p. 454: *And Curiosities for Graffing*, in Dr. Crew's *Anat. of Trunks*, n. 120. p. 486. *Improvements by Sea-sand in Cornwall*, n. 113. p. 293: *Reflections on the same*, n. 114. p. 305. See *Scotland and Advertisements thereon*, in *fr.*

Algebra after a new manner, and call'd *Logistica universæ Mathesi inserviens*, undertaken at Rome by Gottignes, n. 114. p. 309.

Almanack. See the Royal Almanack in Books.

Anatome. *An unusual rupture of the Mesentery*, noted by Dr. Swammerdam, n. 112. p. 273. *Of strange Worms vomited by a Child*, and the present cure, n. 117. p. 393. Another kind of cure of odd vivacious Worms, ib. p. 394. *The Optic nerve examin'd*, and the *Texture of Blood*, of *Sap in Plants*; the figures of *Sugar* and *Salt* a probable cause of their difference in taste, by the Microscop. *Observations of M. Leewenhoeck*, with a *Cut*, n. 117. p. 377, &c. *Anatome of Plants*, and particularly of *Trunks*: See *Malpighi* and *Grew* in Books. A conjecture touching the *Bladder of air in Fishes*, n. 114. p. 310; illustrated by *M. Boyle*, ib. p. 311; *M. Ray* on the same, n. 115. p. 349.

Arts undertaken, or Artifices: *A Bowl* at Rome so exactly counterpoised that it can stop upon an inclin'd plane, even upon a *Looking-glass*, like *Kepler's Watch*, n. 114. p. 309. *The Universal Measure by Sign. Burattini*, ibid. *The Measure of this Terraqueous Globe*, lately taken more exactly by *M. Picart*, with a *Scheme of the manner*, n. 112. p. 261. *Gallies* of several *tyres* of *Oars* of different height, propos'd at Rome by *Sign. Borrelli*, n. 114. p. 309. *A new Map of Paris* design'd by *M. Blondel*, and of Rome by *Sign. Buffalini*, n. 114. p. 309. *A new Essay-Instrument*, to indicate, by weights, in water and air,

(according

# I N D E X.

(according to the Hydrostatical principles,) Gold, Silver, and other Metals from counterfeits and mixtures, by M. Boyle, n. 115. p. 329. An Advertisement on the same Instrument, with instances of excellent Inventions, worthy to be executed, but yet not duly executed for popular uses, n. 116. 353, &c.

Architecture: See Vitruvius in Books.

Astroites or Star-stones, resembling Plants petrified, delineated in Cuts, by M. Lister, n. 112. p. 274. M. Ray on the same, ib. p. 278.

Astronomy: A Lunar Eclipse observed Jan. 11. 1673 at Paris, n. 112. p. 257. On the same by Hevelius, n. 113. p. 285: with the Cut of the Moon. Another Lunar Eclipse of June 26. 1675, observ'd by M. Flamsteed, n. 116. p. 371. On the same from Paris, n. 117. p. 388. More from Siga. Cassini, p. 390. Another Eclipse of the Moon of Decemb 21. 1675. observ'd also by M. Flamsteed, n. 121. p. 495. Horoxes Lunar system vindicated from M. Street, by M. Flamsteed, n. 116. p. 368, with other matters. A Letter from a Spanish Mathematician, proposing a new First Meridian, and pretending to evince the Equality of all Natural days, and to shew the way of knowing the true place of the Moon, r. 118. p. 417. M. Flamsteed's Animadversions on the same, ibid. p. 429. M. Picart's new way of measuring the Terraqueous Globe; suprà in Arts, n. 112. p. 261.

## B

Barbades; some curious gleanings, & after Ligon's history of it, by Dr. Th. Tows, viz. That every house, with Sngar-works and Outhouses, looks like a handsome Town; the whole

Island like a scatter'd City, which with perpetual green Fields and green Woods is make the prospect very pleasant; most houses now built with Stone, and cover'd with Shates, the Soyl very fertil, though no. above one or two foot deep, upon a white and sprungy Lime-stone Rock, which in some places yields good Quarries for buildings; the Springs all near the Sea; in the higher Countys they make Ponds to receive rains, which for the better being kept cool by broad-leaf'd weeds, and Duck-weed which overgrow the Ponds; and now almost every Sugar-plantation hath a Well which gives very good water, their on'y Wine in esteem is from the Malera's, which (contrary to other Wines) will not endure a cool Cellar; the Air most pleasant, neither too cold by night, as formerly, nor too hot by day: On the tops of Mountains, and in cool and shady places, some of our European Plants are found: The Blood of Negro's is black, which seems to be the cause of their black skin, &c. n. 117. p. 399.

Birds, their History. See Wiloughby in Books.

## Books abbreviated.

The R. Almanack, with curious Astronomical observations for A. 1676. and the way to foresee the Changes of weather by the Baroscope, n. 120. p. 490.

Architecture: Vitruvius corrected and rendred French, with Notes and Figures, by Claude Perault, n. 112. p. 279.

D. Barrow, Archimedis opera, Apol. Pergaei Conic. l. 4. Theodosii, &c. novâ methodo illustrata, & succinctè demonstrata, n. 114. p. 314.

Th. Bartholini Acta Medica & Philos. n. 114. p. 315.

Charl. Cotton Esq; the *Planter's Manual*, n.116. p.373.

Lucas Jacobson Debes, his *Description of the Isles of Feroe*, lying under 62 d.10' N. L. full of strange matters, n.119 p.456.

M. Evelyn's *Philos. discourse of Earth Mixtures, and Composts, for improvement of Vegetation, and propagation of Vegetables and Plants in Fields, Groves, and Gardens*, n. 119. p.454.

Dr. Goodall; the *Colledge of London Physicians vindicated*, n.121. p.513.

Anton. Le Grand; *Dissertatio de carentia sensus & cognitionis in Bruttis*, n.112. p.282.

Dr. Grew's *Comparative Anatomy of Trunks in Plants*; with an account of their *Vegetation* grounded thereon, and *Curiosities for Graffing*, n. 120. p.486.

M. Hook's *description of Helioscopes, and some other Instruments*, n.118. p.411.

Marc. Malpighii *Anatome Plantarum, cum Dissertatione de Ovo incubato*, n.117. p.401.

Dr. H. More's *Remarks upon an Essay, touching the Gravitation and Non-Gravitation of Fluid Bodies*, as also upon *Observations touching the Torricellian Experiment*, n.122. p.550

Dr. Morison's *Proposal for finishing the New Universal Herbal*, n.114. p.327.

Sir Hugh Plat's *Garden of Edin*, and his other *Experiments, Observations and Suggestions*, with other encouragements for advance, n.113. 302.

The Gentleman's *Recreations, Hunting, Hawking, Fowling, Fishing, with Philos. Observations*, n.119. 461.

Christoph. Sturmii *Collegium Experimentale*, following the Experimental way of *Philosophizing*, embraced in Engl. France, &c. n.121. 509.

Dr. Sympons *Zymologia Chymica, Fermentation, and of the Sulphur Bath at Knaresborough in Yorkshire*, n.117. p.410.

Vitruvius in French. See *suprà Agriculture*.

Fr. Willoughbeii *Armigeri Ornithologie libri tres*; or, the *History of Birds*, with curious *Philosop. Remarks*; digested and enriched by M. Ray, n.120. p.481.

Note, That Dr. Abr. Munting's *Curiosities for the Culture and Propagation of Exotic Plants*, in Groningen, deserv'd a better fortune, than to be omitted in the Index to Vol. IX. next foregoing. See the Breviate of it there, n.111. p.247.

Botanicks, *Oranges and Lemons*, both separately and in one piece, on the same tree produced at Florence; described by Dr. Natus, n.114. p.313.

A Secret pretending to enlarge *Fruits, Flowers, Plants, Trees*, n.116. p.386. See *Vegetation, infrà*.

## C

Commerce and Navigation: An attempt to discover the North-East passage, n.118. p.417: Compare this with Vol.9. n.101, and n.109. See more *infrà* upon Scotland, n.117. p.398.

# I N D E X.

p.398 ; where by Molucco-beans carried by Tides and Currents to the Shores of Scotland, the said North-East passage to the Molucco's is represented as probable.

## D

**D**amps in Mines, n.117. p. 391; and n.119. p.450; and Fairy Circles in Meadows conceived by M. Walker to be caused by Thunder and Lightning, n.117. p.394.

## F

**F**oisonous Fishes in New Providence, with other Notes from thence, n.114. p.312.

Fountains and Rivers; their Original, n.119.447. **G**

Allies. See Arts.

**G**rafting. See peculiar directions for it in Dr. Grew's Book, *supr.*

## I

**I**mprovements of Cornwal by Sea-sand, n.113. p.293; reflexions on the same, and other instances, n.114. p. 305. Comp. Agriculture *supr.*; and M Evelyn in Books, and Sr. H. Plat; and the Mystery of Agriculture, &c.

Inventions of good use, not yet duly executed, n.116. p. 354.

## L

**L**ight and Colours: M. Linus's Objections against M. Newton on that subject, n. 121. p.499; and M. Newton's Notes thereon, directing how to make the controverted Experiments aright, *ib.* p.500.

## M

**M**aps of Rome and Paris: See Arts, *supr.*

Measure of the Earth lately taken, n.112. p. 261. An Universal Measure propos'd: See Arts, *supr.*

Mathematicals: See Algebra, Astronomy, and Arts, *supr.* and in Books, D. Barrow, Almanack, Vitraru.

F I N I S.

Mercury growing hot with Gold, n.122. p.516.

Microscopical Observations; n.117. p. 377. See Sign. Malpighi, and Dr. Grew in Books.

## N

**N**avigation: See Commerce; Gallies. **O**

**O**pticicks; concerning the Rainbow by Linus, n. 117. p. 386. See Microscop. Observ.

## R

**R**ainbow: See Opticks.

## S

**S**cotland: Extracts from thence about extraordinary Winds there, Lakes, Frosts, a Petrifying water, n.114. p.307. Reflexions on the same, and for Gardens and Nurseries in Scotland, n.116. p.357. More from thence; the odd nature of some Soyl for Corn, n.117. p. 396. How Ink is made there of the yellow flower de Luce, *ib.* p.397. Johnson's Lancashire Aphodill heals wounds, *ibid.* p.398. Molucco-beans found on the shores of the Lewes Island in the west of Scotland, and other materials, which seem to prove the North-East passage, *ib.* p.398. **T**

**T**hunder and Lightning the cause of Fairy Circles, n.117. p.394. **V**

**V**egetation or Vegetables: See Botanisks; Scotland; Dr. Grew and Sign. Malpighi; and M. Evelyn in Books.

Obliging Virtues rewarded with eternal honour, n.112 in Preface. **W**

**W**eights to indicate mixtures of Metals by M.B. n.115. 392.

Winds of a strange temper: See Scotland.

Worms in Children of odd kinds, and the Cure, n.117. p.393,394.
